

Tru-Blue **TWIN BLADE**

The Perfect Cut Every Time!

SAFETY FIRST WITH - NO KICK BACK!

- No sparking - all metal is touchable direct after cutting
- The twin blades & lube system removes almost all the friction
- With 1st blade going clockwise and the 2nd blade going anticlockwise
- The secret is to apply no pressure/force when cutting as this slows down rpm-wearing blades quicker
- Let the weight of the unit push itself through the material you're cutting

LITTLE BROTHER -125mm / 5 INCH PACKAGE \$350.00 +GST

- 1x little bro model @ 5500rpm
- 1x pair of tungsten blades (installed)
- 1x hard case with handle
- 1x lubricating system (installed)
- 1x 6 pack of lube sticks
- 1x wrench with blade locking key attached together

This unit runs @ 5500 rpm ideal for metal cutting. Cuts all metal and can go as deep as 10mm if used as directed. Metal cutting is its primary job - cuts most other materials. Blades used properly give the same as 60 to 70 1mm metal cutting discs = no depth loss.

BIG BROTHER -155mm / 6 & 1/8th INCH PACKAGE \$450.00 +GST

- 1x big brother model @ 4500rpm
- 1x pair of tungsten blades (installed)
- 1x hard case with handle
- 1x lubricating system (installed)
- 1x 6 pack of lube sticks
- 1x wrench with blade locking key attached together

This is the 155mm blade system. The rpm is lower @ 4500rpm so with this model you can't cut as deep as little brother. Idea for deeper cuts in other materials such as hard wood.
